ECOMED Webinar

Learn about the
ECOMED Project and
join the network!

The aim of this project is to generate a sector-specific theoretical and practical syllabus essential for the specialization process of the Mediterranean Ecoengineering sector.

Also, to jointly develop a long-term interaction scheme among the stakeholders of the ecoengineering sector and to deliver a training courses programme technology enhanced in “Soil and Fluvial ecoengineering, Hazard Assessment and Techniques Selection in Mediterranean Environment”.

This new syllabus will be generated during the implementation of the long-term strategy of the proposal “Specialisation process for the ecoengineering sector in the Mediterranean environment (ECOMED)”.
